

Join MAQUET Cardiovascular for a clinical hands-on workshop and discover why VASOVIEW® is the standard of care in minimally invasive vessel harvesting. With 800,000 procedures performed to date, each new VASOVIEW generation has been developed in partnership with the specialists who use them in daily practice. Learn more about how our technology advancements and improved tool ergonomics, combined with dedicated one-on-one training and a comprehensive network of personalized service and specialized programs, can help improve patient outcomes. Advance Registration not required. Seating is available on a first-come, first-served basis.
